**Trees and Shrubs** are the foundation of any native habitat. Besides providing shelter, many trees & shrubs offer early spring blooming flowers and late fall/winter fruit that are crucial to migrant and overwintering birds and pollinators. Maximize your habitat's environmental impact by planting in layers: tuck understory trees & shrubs beneath your tall trees, then fill in the gaps with perennials and groundcovers. Result: more habitat and fewer weeds!

**SHRUBS & TREES FROM CLEMENSON FARMS**

	SPECIES	DESCRIPTION	Price/Plant	Quantity	Amount
